Profile

I'm a tech enthusiast and striving to become a better person than I am today by honing my programming, managing, designing and leading skills. I am currently enrolled in Bachelors in BSc.CSIT. Committed to developing and expanding work experience along with career path.

Skills

- Frontend Development (React JS, HTML, CSS, JS)
- Backend Development (Node JS, Django Framework)
- Redux
- Python
- C/C++ programming
- Git and GitHub
- Database (MySQL, MongoDB)
- Adobe Photoshop, Adobe Illustrator

Education

- **Current**
  - **Bachelors** in BSc.CSIT, Nagarjuna College of IT.
- **2016 June**
  - **+2 (HSEB),** MOLIHSS College
- **2014 April**
  - **SLC**, Zing Secondary School

Academic Projects

- **Portfolio**

It is a website that shows my information about my skills alongside with my projects and academic.

https://susan5591.github.io/react-portfolio/

- **To-Do List using React JS**

It is an application where user can add their task in the list and can perform CRUD operations.

https://github.com/susan5591/Todo-React

- **Movie Website**

It's a simple movie website using React with the different functionality such as searching, adding to watch-list, detail page, cast page etc.

https://github.com/susan5591/Simple-Movie-Web

- **Online Birth Certificates and Driving License Website**

This is a group project done in 6th semester. This website helps user to register data from home and provides the pdf document of the certificates.

https://github.com/susan5591/E-government-Project

- **Multi-User To-Do List**

It's an application developed by using the Django as the backend. Here multiple users can login and user can only access their data and do CRUD operation.
